to create the fakes impression that the Servian government is prepared in great measure to comply with our demands.

"As a matter of fact, however, Serviae note is framed in a spirit of dishonesty which clearly lefs it be seen that the Servian government is not seriously determined to put an end to the enipable tolerance it hitherto has extended to intrigues against the Austro-Hungarian monarchy.

Reservations Far Reaching.

"The, Servian note contains such far reaching reservations and limitations, not only regarding the general principles of our action but also in regard to the individual claims we have put forward; that the concession actually made by Servia become insignificant.
"In particular, our demand for the particular, our demand for the particular of the Austro-Hungarian authorities in investications to detect accomplices in Servian authority has been rejected, while our request that measures be taken against that section of the press hoselife to Austra-Hungary has been declined and our wish that the Servian government take the measures measures to prevent dissolved Austrophohe associations continuing their activity under another form, has not even been considered.

"Since the claims in the Austro-Hungarian note of July 21, regarding the stitude hitherto adopted by Servia, represent the minimum of what is necessary for the establishment of permanent peace with the southeastern monarchy, the Servian absencement for manifestics.

"That the Servian government itself is conscious that its note is not acceptable to us is proved by the circumstance that it proposes at the end of the hote to submit the dispute to arbitration, and invitation, which is thrown into its proper light by the fact that three hours before the appraction of the item limit, the medication of the servinal to the constitution of the time limit, the medication of the servinal to the convention, would be chiliped for a declaration might perhaps be regarded as unnecessary in this instance.
